A Statement by PDK International on Advance CTE’s Proposed Revisions to the National Career Clusters Framework

ARLINGTON, VIRGINIA (February 24, 2022) – Advance CTE recently released proposed updates to the National Career Clusters Framework which is used for a variety of purposes in the world of Career and Technical Education (CTE). One of the changes directly impacting the work of PDK International is the change of the Education and Training Career Cluster to Education.

PDK International supports this change as it emphasizes the value of the teaching profession and the importance of recruiting future educators that are focused on excellence and reflecting the demographics of their community. In addition, it brings further attention to the opportunities available in the education profession, allowing students to explore the career path and begin developing the technical skills they need to become successful and inspiring educators.
